

SKILLSPRINT GLOBAL ? REMOTE WORK & DATA PROTECTION POLICY 2026

SECTION 1: REMOTE WORK INFRASTRUCTURE AND ACCESS

1.1 Virtual Private Network Requirements:

All remote employees must connect to the corporate WireGuard VPN before accessing internal cloud infrastructure, staging environments, or production databases. Split-tunneling is strictly disabled to prevent data leakage across insecure networks.

1.2 Full Disk Encryption:

Laptops and workstations used for company business must maintain 256-bit AES disk encryption. Recovery keys must be escrowed in the corporate key vault during initial device setup.

1.3 Session Timeout Policy:

Remote desktop and cloud console sessions automatically terminate after 15 minutes of inactivity.

SECTION 2: SECURITY INCIDENT RESPONSE PROTOCOL

2.1 Immediate Incident Notification:

Employees must notify the Security Operations Center at security@skillsprint.io within 2 hours of detecting any unauthorized access, phishing compromise, or lost device.

2.2 Data Classification and Export:

Customer personally identifiable information (PII) must never be stored on local drives. All export operations require explicit written authorization from the Data Protection Officer.
